WINTER 2009

body

Our own personal concept of beauty usually begins on the inside and most often is a reflection of what we feel rather than what we see. 2008 has been dubbed the official year of change. In 2008, we ascended to the highest office in the land and now measure ourselves differently. We also witnessed the fall of Wall Street and financial disasters we never thought possible. We credit it all to change.

The true meaning of change is our ability to pass from one moment to another unscared. It's a challenge we all face. Stress and progress both fuel us through the events of our time. Inner beauty and peace now become priceless commodities. Rebuild a new life. restore your money, jobs and things that make you happy. The retreat into self to address and deal with the circumstances of your life during the season of change can be a soulful journey. For the trip I give you Pañpuri.

Panna means wisdom while Puri a palace, and a holy site of pilgrimage. In some eastern languages, Puri also has the connotation of untying what has been tied and making the unknown known, suggesting solution. Pañpuri represents a place where we awaken to be in perfect balance and harmony between our inner and outer selves and our environment.

Use this product to scrub away the outer shell as you work on peeling away your inner self.

Body Polish I \$66. Experience all that Pañpuri has to offer at www.panpuri.com
